

FOR IMMEDIATE RELEASE

Contec, Inc.® Partners with i-team Global to Deliver Cleanroom-Certified, Battery-Powered Mechanized Cleaning System

PowerMop CE is a new, innovative approach to contamination and residue removal on floors in cleanroom environments.

April 21, 2026, Spartanburg, SC — Contec, Inc. is proud to announce its exclusive partnership with i-team Global to launch PowerMop CE, a cleanroom-certified, battery-powered mechanized floor cleaning system designed for critical environments. Adapted from i-team's i-mop 40 unit, PowerMop CE was developed to support the stringent requirements of controlled environments to help facilities reduce cross-contamination risks while effectively removing floor contamination and residue. Designed in accordance with ISO 14644-5 standards, PowerMop CE is certified for use in ISO Class 6/EU Grade C cleanrooms.

Advanced Contamination Control

Engineered for effective cleanroom cleaning and residue removal, PowerMop CE introduces a new approach to cleaning and disinfecting floors in critical environments. Its dual, single-use counter-rotating pads provide consistent, repeatable performance from operator to operator, helping lift and remove particles, bioburden, and chemical residues from floor surfaces. In addition, HEPA filtration on the vacuum exhaust captures airborne particles generated during use, supporting established cleanroom protocols.

Controlled Solution Application

PowerMop CE gives operators greater control over solution application with a simple push-button adjustment for solution laydown, allowing them to respond to varying soil loads across floor surfaces. The vacuum function can be turned off to allow solution to be applied directly to the floor if desired.

Designed with Ergonomics in Mind

The modular design of PowerMop CE enables fast, straightforward assembly in just minutes. Its lightweight construction makes the unit easy to lift and move for cleaning or maintenance. During operation, the single-use counter-rotating pads help propel the machine forward, reducing the physical effort required to maneuver it through the cleanroom.

Availability

PowerMop CE will be exclusively available through Contec in North America in May 2026 and in Europe later in the year. Demonstrations can be scheduled with a Contec Cleanroom sales representative.

Clean counts most

“Contec is excited to partner with i-team Global on this exclusive new mechanized cleaning system. We appreciate the opportunity to work with i-team and with their CEO Frank van de Ven to launch PowerMop CE for use in controlled environments on a worldwide basis,” says Avi Lawrence, President of Contec, Inc.

About Contec, Inc.®

Contec, Inc. is a leading manufacturer of contamination control products for critical environments, including cleanrooms in life sciences, pharmaceutical, biotechnology, and microelectronics industries. With a commitment to innovation and quality, Contec provides cleanroom wipes, disinfectants, mops, and swabs designed to meet the stringent requirements of controlled environments. Our solutions help ensure compliance, reduce contamination risks, and enhance cleanroom cleaning efficiency. Backed by extensive industry expertise and global support, Contec delivers high-performance cleaning products that support aseptic processing, cleanroom residue removal, and sterile cleaning protocols essential for maintaining product integrity and regulatory compliance.

About i-team Global:

i-team Global, headquartered in Eindhoven, specialises in innovative cleaning solutions designed to enhance efficiency and sustainability. With a commitment to quality and technological advancement, i-team Global serves a global market with a range of cutting-edge products.
